Summary

Senior Quality Assurance Engineer with expertise in automation, API, and AI quality assurance. Proven experience delivering high-quality enterprise software through manual and automated testing, validating OpenAI-powered applications, Retrieval-Augmented Generation (RAG) workflows, LLM guardrails, and conversational AI. Skilled in Selenium, Playwright, TypeScript, Azure Monitor, Kusto Query Language (KQL), CI/CD, and end-to-end quality engineering for enterprise applications.

Professional Experience

08/2023 – Present
Mississauga, Ontario

Senior Quality Assurance Engineer, SOTI Inc

Project Stella (SOTI's own chat-bot) (July 2025 - Present):

- Designed and executed comprehensive **manual, automation, API, and end-to-end** test strategies for AI-powered features, covering Smoke, Regression, Integration, Exploratory, and E2E testing.
- Validated **Retrieval-Augmented Generation (RAG)** workflows, ensuring accurate knowledge retrieval, response generation, and adherence to business logic.
- Verified **LLM** responses against established guardrails, ensuring outputs were accurate, compliant, safe, and aligned with business requirements.
- Tested complex conversational intents by validating background orchestration, tool invocations, **OpenAI API** interactions, and workflow execution across multiple services.
- Performed functional and integration testing of OpenAI API implementations, validating prompt execution, response handling, retries, error scenarios, and fallback mechanisms.
- Conducted AI response accuracy, hallucination, consistency, and regression testing across model and prompt updates.
- Leveraged Azure Monitor and Kusto Query Language (KQL) to troubleshoot failures, analyze logs, and validate backend processing for AI workflows.

Project Signal (SOTI's own alerting engine) (Aug 2023 - June 2025):

- Test Strategy & Planning: Design, develop, and document comprehensive test strategies, test plans, and test cases based on software requirements and technical specifications for all SOTI's product offerings.
- Automation Development: Implement, maintain, and enhance automated test frameworks and scripts using Selenium and Playwright with TypeScript to improve testing efficiency and coverage.
- Web & Mobile Test Automation: Create automated test scripts for SOTI's Web and Mobile applications, ensuring seamless functionality across different platforms and devices.

- **Collaboration & Leadership:** Work closely with cross-functional teams, including developers, product managers, and business stakeholders, to ensure quality across the software development lifecycle.
- **Sprint Testing & Agile Processes:** Lead and monitor test execution for each sprint in Agile environments, ensuring continuous integration and continuous deployment (CI/CD) pipelines incorporate automated testing.
- **Defect Management & Reporting:** Track, report, and analyze defects, providing insights into root causes and driving resolutions to enhance software stability.
- **Exploratory & Ad-hoc Testing:** Conduct exploratory testing on SOTI's applications to uncover edge cases and usability issues before formal test execution.
- **Process Improvement & Standardization:** Drive QA process improvements to enhance consistency and efficiency across different product lines, leveraging automation to reduce manual testing efforts.
- **Mentorship & Knowledge Sharing:** Onboard, guide and mentor junior QA engineers, fostering best practices in automation testing, scripting, and test case design.

01/2021 – 07/2023
Mississauga, Ontario

Quality Assurance Engineer, SOTI Inc

- **Test Planning & Execution:** Assist in designing, developing, and documenting test strategies, test plans, and test cases based on software requirements and technical specifications.
- **Agile & Sprint Testing:** Participate in sprint testing activities, executing test cases and reporting defects to ensure high-quality releases.
- **Defect Reporting & Tracking:** Identify, log, and track bugs using defect management tools, collaborating with developers for resolutions.
- **Continuous Learning & Skill Development:** Stay updated on automation tools, best practices, and methodologies to enhance testing knowledge and effectiveness.

11/2021 – 12/2021
Mississauga, Ontario

Technical Support Engineer - Level Three and Subject Matter Expert (SOTI Snap), SOTI Inc

- Served as the Subject Matter Expert (SME) for SOTI Snap, acting as the primary point of contact for the technical support department.
- Managed escalations from Level 1, Level 2, and Level 3 technical support specialists, working closely with the Executive Escalations Team and Development Team to resolve high-visibility enterprise customer issues.
- Mentored, trained, and coached Level 1 and Level 2 support specialists, including members from other departments.
- Collaborated with Product Managers and Product Owners in jam sessions to enhance product experience and improve features across different product lines.

03/2020 – 10/2021
Mississauga, Ontario

Technical Support Engineer - Level Two, SOTI Inc

- Acted as an aligned resource engineer for enterprise accounts, troubleshooting technical issues and identifying software bugs.
- Served as an escalation point for Level 1 support specialists.
- Reviewed, inspected, and validated development tickets before escalating them to the Development Team.
- Revamped SharePoint Online to a new, ISO 27001-compliant version.
- Designated Subject Matter Expert for SOTI Snap and SOTI Insight within the SOTI One Platform.

- Delivered training sessions and presentations to the support team based on product expertise.

05/2019 – 02/2020
Mississauga, Ontario

Technical Support Engineer - Level One, SOTI Inc

- Provided technical support via phone, email, and customer portal for SOTI's software products.
- Acted as a technical lead for the registration process of SOTI Sync 2019, the annual end-user and OEM conference.
- Collaborated with developers to report and track software bugs using JIRA.
- Analyzed and monitored Amazon Web Services (AWS) cloud servers, responding to downtime issues in collaboration with the AWS cloud team.
- Monitored 5,000+ cloud servers, ensuring alerts were addressed within SLA standards.
- Worked closely with the Salesforce Team to implement changes based on new product versions.
- Recognized as SOTI Certified MobiControl v15 Expert on October 2, 2019, by SOTI Academy.

01/2018 – 05/2019
Toronto, Ontario

Peer Tutor, Humber College Institute of Technology and Advanced Learning

- Assisted students in understanding complex computer programming concepts, including C++, C#, and relational databases.
- Created custom learning materials and lesson plans to improve student comprehension.
- Provided one-on-one tutoring and academic counseling to students struggling with coursework.
- Supported faculty members by offering in-class learning assistance for students requiring additional guidance.
- Reported student progress and performance updates to the Program Coordinator.
- Led peer training sessions, fostering a collaborative learning environment.
- Motivated students to improve their grades by promoting effective study habits and continuous learning.

Education

2017 – 2019
Toronto, Ontario

Computer Science, Humber College Institute of Technology and Advanced Learning

- Gained comprehensive understanding of computer programming, systems analysis, project management, and database management, enriching my information technology (IT) and web development expertise.
- Acquired in-depth knowledge of the full software development lifecycle, including planning, development, testing, and support, in accordance with industry standards.

Certificates

Android Enterprise Associate
Google, Issued February 2020

CompTIA Network+
CompTIA, Issued September 2019

SOTI Certified MobiControl Expert
SOTI Inc, Issued October 2019
